## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-4 and 6-10 are rejected under 35 U.S.C. 102(a) or (e) as being anticipated by Lee (6,520,473), which shows all of the claimed limitations. Lee shows a transportable grill including, among other things, a lateral element 20, a vertical element 64, and a grill unit 12, the lateral element comprising a mounting element 40 and a

junction element 24, wherein said junction element allows traverse of the junction element relative to the vertical element to allow alternately positioning the junction element and associated lateral element in travel and use positions, wherein said junction element further comprises a locking feature and retention feature (see at least fig. 10) , wherein said transportable grill further comprises a lifting device 66,90,96.

3. Claims 1-10 are rejected under 35 U.S.C. 102(a) or (e) as being anticipated by LeDuc (6,701,913), which shows all of the claimed limitations. LeDuc shows a transportable grill including, among other things, a lateral element 324, a vertical element 384, and a grill unit 348,416, the lateral element comprising a mounting element 306 and a junction element 340,376, wherein said junction element allows traverse of the junction element relative to the vertical element to allow alternately positioning the junction element and associated lateral element in travel and use positions, wherein said junction element further comprises a locking feature 388 for locking the position of the junction element relative to the vertical element, wherein said mounting element further comprises a retention feature 312 to retain said mounting element in a receiver hitch when said mounting feature is engaged to a receiver hitch, wherein said transportable grill further comprises a lifting device 410 for assisting a user in positioning the junction element relative to the vertical element, and wherein the lateral element is hinged (see at least fig. 3, 350) relative to the junction element.
